ABSTRACT

This annual report presents national data on Catholic elementary and secondary schools. Enrollment patterns, regional geographic trends, types and locations of schools, student and staffing demographic characteristics, and student participation in selected education programs are reported. The findings show that Catholic school enrollment has remained stable over the past year. While several of the large urban areas, such as Chicago, Philadelphia, and Pittsburgh, have reported slight declines in enrollment, other areas, particularly the Southeast and West/Far West regions, have experienced modest increases. Waiting lists now exist in most suburban schools, and where diocesan and privately funded scholarship support is available in innercity schools, long waiting lists for lottery-like selection processes have resulted. Overall, there were 8,217 Catholic schools, with 36 new schools opening during the period of the survey. Coeducational schools comprised 94 percent of all the Catholic schools, and 41 percent of all schools had a waiting list for admission. Total Catholic-school student enrollment was placed at 2,648,844, with 1,990,947 of these students attending elementary school. The student/teacher ratio was 17:1, with 153,081 full-time-equivalent professional staff. Four appendices provide a summary report of basic school statistics and information on professional staff, school locations, and supplemental services. (RJM)

PREFACE

The National Catholic Educational Association (NCEA) has been providing leadership and service to Catholic education since 1904. It is the largest private professional association in the world, representing more than 200,000 educators serving over 7.6 million students in preschools, elementary and secondary schools, parish catechetical and religious education programs, diocesan offices, colleges, universities and seminaries.

Located in our nation's capital, NCEA's mission is to advance the educational and catechetical mission of the church and provide leadership and service to its members. The association also articulates the contribution of Catholic education to the church and society and proclaims the uniqueness of Catholic schools.

Since 1970, the National Catholic Educational Association has published a statistical report on Catholic elementary and secondary schools in the United States. Prior to this time extensive data did not exist for these and other private schools. These annual reports are designed to provide an understanding of this significant sector of American education, to inform the public discussion of educational policy issues and to encourage and improve practice at the school level.

The first part of this report presents data concerning the context of American education in which private schools operate. This is followed by Catholic school enrollment and staffing demographic data that highlight school, student and staffing characteristics and special services provided to students in Catholic schools.

The report is based upon census data gathered by each of the 175 archdiocesan and diocesan offices of education in the United States. We are most grateful to these administrators and their staffs for their cooperation. While there is a diocesan response rate of 100%, the data do not include responses to all of the items by all of the dioceses or by all the schools within each diocese.

I wish to thank the members of the NCEA Data Bank Committee: Mr. Michael Guerra, Executive Director, Department of Secondary Schools; Ms. Regina Haney, Executive Director, National Association of Boards of Education; Dr. Robert Kealey, Executive Director, Department of Elementary Schools; Sr. Lourdes Sheehan, RSM, Executive Director, CACE Department; and Ms. Barbara Keebler, Director of Communications for their suggestions and editorial assistance for this report. I am especially grateful to Mr. Wade Marshall, Director of Member and Information Services, for his expertise in developing the reports, Ms. Tara Millington for the data entry and Ms. Susan Tineo for preparing the manuscript for publication.

Dale McDonald, PBVM, PhD
Director of Public Policy and Educational Research

April 1999

EXECUTIVE SUMMARY

This annual report presents national data on Catholic elementary and secondary schools. Enrollment patterns, regional geographic trends, types and locations of schools, student and staffing demographic characteristics and student participation in selected education programs are reported. Where data permit, the exhibits compare information across the last decade as well as with the past year.

Catholic school enrollment has remained stable over the past year. While several of the large urban areas, especially in the dioceses of Chicago, Philadelphia, Pittsburgh, Brooklyn, Detroit and Toledo reported slight declines (1-2% of enrollment), other areas, particularly the Southeast and West/Far West regions, experienced modest increases of similar magnitude. Overall, total Catholic school enrollment has increased by more than 81,000 students during the past six years. Waiting lists now exist in most suburban schools, and, where diocesan and privately funded scholarship support is available in inner-city schools, long waiting lists for lottery-like selection processes have resulted. In addition, more than 200 new schools have opened within the last decade; this year 36 new schools opened across the nation.

The positive contribution which Catholic schools make to the education of America's children may be inferred from the statistical data presented and the number of non-Catholic families that entrust their children to Catholic schools. This is a testimony to the collaboration and commitment which the more than 155,000 teachers, and 8,000 administrators and 6,000 school boards/commissions have made to the youth and families served in Catholic schools.

HIGHLIGHTS

Enrollment:

- Total Catholic school student enrollment for the current academic year is 2,648,844: 1,990,947, elementary school; 22,155 middle school; 635,742 secondary school.
- Minority student enrollment is 656,007 which is 24.7% of the total enrollment.
- Non-Catholic enrollment is 355,832 which is 13.4% of Catholic school enrollment.

Schools:

- There are 8,217 Catholic schools: 6,863 elementary; 127 middle; 1,227 secondary.
- 36 new schools opened; with closings and consolidations, there are 6 fewer schools than last year.
- There are 3,401 schools (41%) which have a waiting list for admission.
- Coeducational schools comprise 94% of all schools; at the secondary level, 35.6% of all schools are single gender.

Professional Staff

- Full-time equivalent professional staff numbered 153,081: laity 92.1%, religious/clergy 7.8%: lay women: 73.6%; lay men: 18.5%; sisters: 6.2; brothers: <1%; priests: <1%
- The student/teacher ratio is 17:1.

THE CONTEXT OF AMERICAN PRIVATE EDUCATION

Public/Private School Comparisons

Private schools, defined as those controlled by a non-governmental entity and financed from sources other than public taxation, have been an important component of American education since colonial days. The existence of private schools reflects the fundamental right of parents to exercise freedom of choice in selecting the education they deem most appropriate for their children. Parents select private schools based on several factors, among which are the religious, educational, cultural and social values that are espoused by the institution.

The National Center for Educational Statistics (NCES) survey of the private schools during the 1995 -1996 school year indicates that were 27,686 private elementary and secondary schools in the United States. Private schools account for 24.4% of all American schools. Private schools enroll approximately 5 million students, representing 10% of total elementary and secondary student enrollment in the United States.

Private schools are categorized as Catholic, other religious and non-sectarian. Catholic schools are classified as a) parochial, b) diocesan, c) private. The category other religious schools is comprised of three typologies: a) schools identified as conservative Christian, b) schools affiliated with a specific religious national denomination, c) schools not aligned with a national denomination. Non-sectarian schools are a) regular, b) special emphasis, c) special education.

Schools which are classified as other religious constitute 47% of private schools, Catholic schools represent 30% and non-sectarian 23%. In contrast to the number of schools, there is a higher percentage of students in Catholic schools which enroll 50% of private school students while other religious schools enroll 35% and nonsectarian 15%.

CATHOLIC SCHOOL DEMOGRAPHICS: 1998-1999 ACADEMIC YEAR

School Characteristics

Number of Schools

In 1998-99, there were 8,217 Catholic schools in the United States; of these, 6,863 were elementary, 127 were middle and 1,227 were secondary.

Regional Distribution

The National Catholic Educational Association groups the schools and dioceses/archdioceses into the following six geographical regions:

New England:	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
Mideast:	Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania
Great Lakes:	Illinois, Indiana, Michigan, Ohio, Wisconsin
Plains:	Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Southeast:	Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia
West/Far West:	Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Exhibit 4 presents the number of schools by region and the percentages of the regional distribution. The Mideast and Great Lakes regions, at over 52.8 percent of the total number of Catholic schools, continue to have the largest percentage of schools with the rest of the nation maintaining stable enrollments. Middle schools, which reflect a relatively recent trend and focus in both public and private education, have been reported separately from elementary schools since 1995. Middle schools constituted only 1.5 percent of Catholic schools; the elementary school with a middle school program is the more common model.

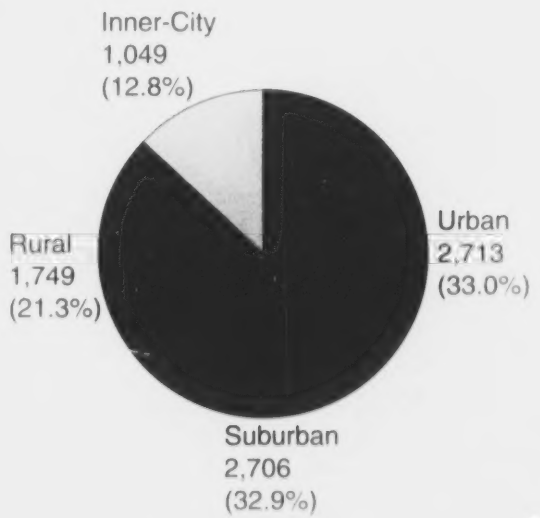
*Middle schools reported as a separate group beginning in 1994-95; prior to this date they were included in the elementary school count.

Location of Schools

During the 1980s and early 1990s, the highest percentage of elementary and secondary schools was found in urban areas. At that time, NCEA reports included inner-city schools as part of the urban total; separate reporting of inner-city school began in 1991. Exhibit 5 illustrates the continued presence of Catholic schools in urban and inner city areas while also indicating the rise in suburban schools.

EXHIBIT 5
Location of Schools
1998-99

	Elementary/Middle		Secondary	
	Number	**%**	**Number**	**%**
Urban	2,243	33.0	470	38.3
Inner-City	928	12.8	121	9.9
Suburban	2,262	32.4	444	36.2
Rural	1,557	22.3	192	15.6
Total	6,990	100.0	1,227	100.0



Total: 8,217 (100.0%)

*127 Middle schools (predominantly urban) are included with elementary schools.

Types of Schools

Catholic school typologies are determined by the source of their sponsorship. There are four classifications of Catholic schools: parish (sponsored by a single parish), inter-parish (sponsored by two or more parishes), diocesan (sponsored by the arch/diocese), and private (sponsored by a religious order or a private corporation). Exhibit 6 indicates that most elementary schools are parish schools; however, in the last decade, the growth in the number and percentage of elementary inter-parish schools continued. This growth underlines the reorganization of Catholic schools through consolidations.

In this section of the report, middle schools are included with the elementary.

EXHIBIT 6
Schools by Types of Governance

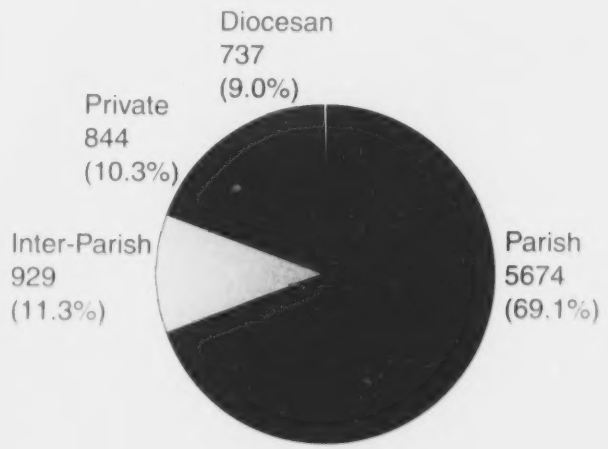
Private	328	4.7	516	42.0
Total	6,990	100.0	1,227	100.0



School Boards/Commissions/Councils

The 1998-99 collection of data from Catholic schools revealed that of 8,217 schools, 6,008 reported having an existing school board, commission or council. See Appendix D for a summary report by region and state.

Enrollment by Region

The total enrollment data, charted by region in Exhibit 10, indicates that although the Mideast, Great Lakes, and Plains regions showed decline, those regions continue to enroll almost two-thirds (63.1%) of the students in Catholic schools. All other regions showed an increase in overall enrollment numbers, with the West/Far West growing significantly.

Prior to 1991-92, statistics for total enrollment did not include Pre-kindergarten enrollment.

*Middle schools reported as a separate group beginning in 1994-95; prior to this date they were included in the elementary school count.

States with Highest School Enrollments

As detailed in Exhibit 11, ten states accounted for nearly two-thirds of Catholic school enrollment. New York, California, Pennsylvania, Illinois and Ohio — the top five — had 45.1% of total enrollment. The decreasing percentage and the position changes in this list reflect increased enrollment in areas not formerly associated with traditionally large Catholic population centers.

EXHIBIT 11
Student Enrollment: States with Ten Highest Enrollments

Schools with Waiting Lists

The steady increase of enrollment numbers, combined with school closures and consolidations, has resulted in 41.3% of the schools having to place students on waiting lists for admissions.

EXHIBIT 12

Dioceses with Largest Enrollments

The twenty largest dioceses serve over 46% of the total enrollment in Catholic elementary, middle and secondary schools, as illustrated in Exhibit 13. (Many dioceses are larger than the metropolitan area of their title.) Most of the enrollment in these 20 dioceses comes from the major city and the immediate suburbs of that area. Again, the decreasing percentage and the position changes in this list reflect increased enrollment in areas not with traditionally large Catholic population centers.

Tuition and Costs

Tuition fees paid by families constitute a portion of the actual per pupil expenses. The average per pupil tuition in elementary schools is $1,499. which is approximately 62% of actual costs per pupil. About 82% of elementary schools provide some form of tuition assistance.

The secondary median freshman tuition is $4,100. which is approximately 75% of actual costs. About 97% of secondary schools provide some form of tuition assistance.

The difference between the per pupil cost and the tuition charged is obtained in many ways, primarily through direct subsidy from parish, diocesan or religious congregations resources and from multi-faceted development programs and fund-raising activities.

EXHIBIT 14
Average Tuition and Per Pupil Costs

Elementary
Median parish school tuition: $1,499 Per pupil cost: $2,414

Secondary
Median freshman tuition: $4,100 Per pupil cost: $5,466

Based on the average public school per pupil cost of $6,512. Catholic schools provide more than $17.2 billion dollars a year savings to the nation.

Student Characteristics

Student Ethnicity

Catholic schools, especially in urban areas, continue to serve increasing numbers of ethnic minority students. In 1970-71 minority enrollment was 10.8% of the total; ten years later it had increased to 19.4% and in 1997-98 it is 24.7%. Minority enrollment is largest in the West/Far West (47.1%) and smallest in the Plains region (8.4%).

Enrollment of Non-Catholics

Most Catholic school students are Catholic. However, non-Catholic student enrollment has risen from the 2.7% in 1970. Non-Catholic enrollment rose to 11.2% a decade later and today is 13.4% as shown in Exhibit 16.

Staffing of Catholic Schools

In 1998-1999, the total, full-time equivalent (FTE) teaching staff in Catholic elementary, middle and secondary schools is 153,081.

Full-time and part-time staff totals were collected according to a weighted formula for different hours of part-time work. Dioceses were asked to provide a full-time count and the part-time counts, weighted as .33. The FTE represents the total of the full-time and the weighted part-time professional staff members.

Per pupil ratios: The pupil/teacher ratio in Catholic schools in 1998-99, determined by the FTE, was approximately 17:1 By level they are: elementary schools: 19:1, middle schools: 11:1, secondary schools: 13:1.

Over the past decade, the lay faculty percentages increased from 84% to the current 92.1%. At present, 7.8% of the professional staff are religious and clergy. Exhibit 17 presents the FTE data by category and percentage.

Ethnic and religious background data regarding all of the professional staff were collected from 172 of the 175 dioceses. Exhibit 18 details the numbers and percentages of the non-Catholic professional staff members and Exhibit 19 provides the ethnic breakdowns and percentages within each of the regions of the nation.

Special Services to Students

Extended Day Programs

The 1998-99 data collection of Catholic elementary and middle schools revealed that of all schools reporting this information 4,271 had extended day programs involving before and/or after school activities. This represents 61.1% of elementary/middle schools. See Appendix D for a summary report by region and state.

Federal Nutrition Programs

The 1998-99 data collection reveals that many schools participate in the federal nutrition programs that provide free or reduced price breakfast and/or lunch to students whose family income level meets established criteria. The number of students receiving such services are indicated in Exhibit 22. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied these data.

Government Subsidized/Free Transportation to School

Many dioceses reported that students were provided free or subsidized transportation services to/from school by local or state governments. The number of students reported receiving such services is indicated in Exhibit 23. Not all dioceses have provided this information.

EXHIBIT 23
Students Receiving Government Subsidized/ Free Transportation to School

Region	# of Schools	Students Receiving Services
New England	273	24,528
Mideast	1,125	182,038
Great Lakes	1,542	224,326

West/Far West	44	1,101
Total	3,527	494,714

Technology:

In this survey, dioceses were asked to report on the number of schools which provide students with access to the Internet. The number of schools that make this technology available to students is listed in Exhibit 24. This year schools were able to apply for discounted telecommunications services under a program known as the E-Rate. The number of schools that applied is included in Exhibit 24. Not all dioceses provided this information.
